Program

Overview

The puppeteer Gregor Schwank will introduce the audience to the fascinating world of puppetry with a blend of charm, humour and delight.

The performance starts with magic scenes of “Varieté” - beautiful and aesthetic string-marionettes carved out of wood by the artist himself: the mysterious night-fairy, the little hobgoblin “Miquito” and other fantastic creatures.

Afterwards a practical demonstration and lecture with a photo-documentation give examples how to approach the community with educational theatre for health awareness raising.
