

Dr. Silvia Runge-Ranzinger, MD, MScIH, DTM&H, Public Health Expert has as an Infectious Disease Specialist longstanding experience in clinical medicine and public health. She has worked and published particularly in the area of translating research evidence into health policy recommendations, using methods as systematic literature reviews, expert consensus, guidelines development, qualitative or mixed method approaches, gap analysis and others. She has work experience for many years in projects for WHO-TDR, e.g. as manager of the Disease Reference Group on Dengue and other Emerging Viral Disease of Public Health Importance (University of Oxford), coordinator of a WHO clinical handbook (WHO-TDR) and currently as lead author of a WHO handbook on dengue contingency planning. She has also work experience as an investigator in two EU funded research projects, previously in (Microdis- “Microlevel of disaster: Integrated Health, Social and Economic Impacts of Extreme Events” FP6) in a consortium for “evaplan” (University of Heidelberg), and currently in (IDAMS – “International Research Consortium on Dengue Risk Assessment, Management and Surveillance” FP7) for WHO-TDR. Within her work experience in general she has been working in many diverse cultural settings, as for example in Cambodia, Cuba, India, Indonesia, Malaysia, Nepal, Panama, Thailand and Vietnam. After doing her Master’s and Doctoral degrees at the University of Heidelberg/Institute of Public Health, she is still affiliated to the Institute as well contributing to research and teaching activities.
